Making furniture innovative

OrgaPanel.

A Multifunctional Organizational Talent

With time, desks tend to become cluttered up, with no more space for the user's actual tasks. This is where the new OrgaPanel by Merkt comes in: It organizes vertically anything that does not belong on the horizontal workspace. The OrgaPanel is attached to precisely the work panel that has now been freed up. And it is as easy as pie.

Other useful functions the OrgaPanel performs include as a movable partition and acoustic shield from neighbors and the general surroundings. All this promotes concentrated, structured working.

In addition to Merkt workplace systems the Merkt OrgaPanel can be fitted to and used with most standard market desk systems, if desired on their supporting structure.

Can be used on both sides:
The OrgaPanel also reveals its diverse organizational talent on its rear.

① **OrgaPanel** The triplelayer steel panel serves as the system's sturdy base and, a mere 5mm thick, it is extremely elegant.

② **Magnet set** The ferromagnetic material means OrgaPanel is perfect for use as a magnetic wall.

③ **Trays** in different sizes make the OrgaPanel an efficient organizational talent.

④ **Board** Different-sized organization areas significantly increase the overall storage space of any desk equipped with the OrgaPanel.

⑤ **Key and pen board** for storing pens and hanging up keys and similar implements.

The OrgaPanel comprises a basic panel and a number of attachment modules. Merkt supplies the new OrgaPanel and the relevant modules in the colour of your choice, though the robust panel core is always black. The steel construction of the OrgaPanel makes it extremely robust and even usable as a magnet wall.
